

FLOKI ONE

The first Floki on the Harmony One Mainnet
One of the OG projects on the chain

Why Floki One?

Floki One isn't one of the overnight projects that you see popping up because of the recent hype around Harmony One.

We launched over a month ago, on September 12th, 2021, to be exact. Not only are we the first Floki on the Harmony One mainnet, but we are also one of the OG projects on here.

Giving back

When Floki One launched in September, there was little to no volume, and because of this, we were at time's mercy. However, now that Harmony One is getting the attention that it deserves, we are ready to embrace this volume.

Floki One will be giving back to the community by hosting giveaways (*either in \$ONE or \$FLOKI*), competitions, and even occasional over-the-counter buys for a cheaper price.

Tokenomics

Total supply: One quadrillion

Circulating: 400 trillion (60% burnt)

8% tax on all transactions.

- 4% goes towards liquidity, to ensure that we're building a stronger floor.
- 4% will get redistributed amongst holders, as they will earn \$FLOKI by just holding.

NFT line

Floki One will be rolling out its own NFT line on Harmony One. This release will be very limited, as there will only ever be 500 NFTs available for mint. Those who wish to mint will do so through our website once those components have been added. The price for minting has not been determined at this time.

Play-to-earn Game

Floki One will also be creating not one, but two play-to-earn (P2E) games. Users will be able to play for a chance to win a daily prize, which will be paid out in either \$ONE or \$FLOKI (TBD).

The first game will be simpler in nature, and will be released as an appetizer of sorts. The estimated time of release is mid-November.

The second game will be more extensive and will be rolled out in early 2022.

NFT Marketplace

Floki One will be creating its own NFT Marketplace on the Harmony One mainnet.

Our NFT line will be the first to drop on the marketplace, and then we'll allow for other NFT projects to land on the platform as well.

Why is the marketplace good for Floki One holders? Not only will it increase exposure, but a percentage of the tax collected on every NFT buy and sell will be used to buy back \$FLOKI.
